

# Cloud Migration Analysis

ACTS & CAST Application Pilot

## Build Modern Cloud Based Business Systems

ACTS will partner with you to analyze up to 10 applications for cloud & modernization readiness **using the CAST Highlight Platform**. The analysis will include a cloud migration strategy customized to your organization's priorities, a ranking of the best candidates for cloud migration, and recommendations on Azure Cloud Services.

ACTS will design and execute a cloud migration or application modernization campaign based on your business goals and enable you to adopt intelligent cloud services like **DbaaS, Cloud App Engine, API, IOT and Authentication Services**.

Under certain circumstances some or all of this engagement may be subsidized, email [CloudModern@actsolution.net](mailto:CloudModern@actsolution.net) to see if you qualify.

“ The top companies in the world are **being outpaced by those who have already moved into the cloud**. According to Gartner within the next 5 years “more than **50% of enterprises** will run mission-critical, containerized cloud native applications in production.”

## Cloud Migration Questions to Consider

- What is your cloud migration strategy?
- Which workloads can be optimized for PaaS and migrated faster?
- Are there consolidation or retirement opportunities before migration?
- What is the modernization journey for your critical applications to maximize benefits from Microsoft Azure?

# Reduce the Risk of Migration

Take away the guess work, by getting the quantitative data about your applications to inform your migration strategy

## Position Yourself for Migration

This pilot analysis allows you to understand your top 10 applications in their current state and create a roadmap for your future cloud goals. It will cover migration prioritization, application investments, and total cost savings.

ACTS will help you collect all the data points required, via surveys and code scans to help you set your strategy and roadmap. This strategy and roadmap will be based on your organization's priorities enabling faster cloud migration and modernization results.

---

## A Cloud Migration Analysis Includes:

-  **Design and execution** of a cloud migration or application modernization campaign based on your organization's cloud priorities
-  **Development of a survey** to collect critical inputs required for planning and execution
-  **Scanning up to 10 applications** to provide in-depth insights on application readiness
-  **A snapshot for the 10 applications** and their cloud readiness assessment
-  **Findings and recommendations** from ACTS Cloud Expert Architects to help you set your strategy and roadmap
-  **Guidance** on how to utilize CAST Highlight Platform for on-going analysis and future campaigns

---

## Next Steps

Prioritize your application portfolio and create a roadmap for your future cloud goals.
